

TEAMS

A series of 3 x 2.5-hour workshops

**This was originally done face to face.
It can also be achieved virtually.**

The value in developing great teams is in productivity, time, efficiency and engagement. When team members really know whose role is what, how they fit into the group and how to look out for and support one another, performance can really rocket.

This engaging and productive team development workshop series looks at the types of teams that exist, where the team are on that plain and how they can become the type of team they wish to be.

A route to success is created together in the workshops, including the agreed alignments and behaviours the team wish to see and be a part of.

STEP ONE: WHAT TYPE OF TEAM?

Introduction to teams and the different types of teams that exist (project, working, changing, permanent etc.) and what type of team the group is. Defining the group's team target.

STEP TWO: STRENGTHS AND BENDY BITS!

A session defining where we are now compared to where we want to be. What are the stronger points (the foundations)? And where are the bendy bits and weaker connections?

STEP THREE: STRENGTHENING AND BRIDGING

Bridging the gaps – what do the team need to do to overcome the weaker points? Action plans are set up and agreed across the group.

Strengthening the foundations – what do the team need to do to strengthen further what they're great at? What will develop them into a truly high performing team?

A final action plan is agreed across the team.
